**Subject:** FW: West Lake Landfill - Power Point Presentation made at the January 17, 2013 Public Meeting in Bridgeton, MO  
West Lake Jan2013 Public Meeting.pptx

Hi LaTonya:

Here is a brief snapshot of our e-mail exchanges, which were done after we held a 45-minute phone conversation. She was very pleasant and had some basic questions about the landfill owners and their role in responding to citizen concerns, as well as their responsiveness to EPA & MDNR on any compliance issues.

After our conversation, I told her she could contact me at any time to discuss current community rumors, and when we construct our next public meeting, I would definitely include her in our mailings.

Thanks for passing her information to me - I think she seems to be very reasonable and literally seeking the facts & truth over speculation & rumor.

Debbie

Subject: West Lake Landfill - Power Point Presentation made at the January 17, 2013 Public Meeting in Bridgeton, MO

Hi Rebecca:

It was a pleasure to speak with you this afternoon. I am attaching the power point presentation that EPA's Project Manager, Dan Gravatt, presented at EPA's January 17th public meeting. I believe slide 4 actually shows you in a color-coded fashion the distinction between Operable Unit 1 (landfill cell that has a mixture of solid waste refuse, debris, and radiologically-contaminated materials contained in it) and Operable Unit 2 (former Bridgeton landfill cell that has the regular mix of landfill materials (everything from trash to construction debris, but NO radiological materials) contained in it.

Please feel free to respond electronically, if you have additional questions or feel free to call me at the number listed below.

Thanks again.

Debbie
